Attention:

This product has ozone disinfection to effectively kill all kinds of bacteria attached to banknotes. Such as E. coli, hepatitis A, hepatitis B and other types of bacteria!

Ozone sterilizers are known as "enriched oxygen" and "triple oxygen". He is widely recognized in the world as a broad-spectrum, efficient, and environmentally friendly disinfectant. With strong sterilization, deodorizing and deodorizing functions. At a certain concentration, when ozone is killed on the surface of the body, bacteria in the air in the water will be reduced to oxygen and a single oxygen atom by themselves. There is no toxic residue, so there is no secondary pollution. This is something that some chemical agents cannot do. Because of this, ozone is also called "green elements".

Specifications:

Capacity:4000 notes

Disinfecting time:20 minutes

Power source:110V 60HZ or 220V 50HZ

Net.weight:4.5kg

Dimension:350*300*290mm

Volume:40L

Gross.weight:4.8kg

Packaging parameters:390*350*320mm
